### SUMMARY

Blockchain Developer specializing in Hyperledger Fabric, distributed ledger infrastructure, and secure IoT data validation. Experienced in deploying multi-node Fabric networks, implementing MSP and X.509 identity management, and integrating LoRaWAN systems with blockchain for tamper-resistant verification. Strong background in backend integration, PostgreSQL validation, and React.js dashboard development.

### TECHNICAL SKILLS

**Languages:** JavaScript, Python

**Frontend:** React.js, Tailwind CSS, Recharts, Responsive Design

**Backend:** Node.js, Express.js

**Blockchain:** Hyperledger Fabric 2.x, Raft Consensus, X.509 Certificates

**Database:** PostgreSQL, Firebase

**Tools:** Docker Compose, Linux (Ubuntu), Git, Cloud Deployment (DigitalOcean)

### PROFESSIONAL EXPERIENCE

#### Blockchain Infrastructure Lead | Buklod IoT Blockchain System

March 2026 – Present

- Deployed a 7-node Hyperledger Fabric network across 6 DigitalOcean droplets using 3 Raft Orderers and 2 Peer nodes.
- Built a secure LoRaWAN-to-blockchain pipeline using Gateway, ChirpStack, MQTT, Node-RED, PostgreSQL, and Hyperledger Fabric.
- Developed SHA-256 hash generation and verification workflows for immutable dataset validation and tamper detection.
- Implemented MSP and X.509 certificate-based identity management for users and hardware devices.
- Designed Zero Trust transaction validation using blockchain-backed ownership and access control.

#### Blockchain & Frontend Developer | Hijo Resources Corporation Intern

Nov 2025 – Feb 2026

- Led frontend development for a blockchain-based e-voting system within a 4-month delivery timeline.
- Built responsive dashboards for COMELEC administrators, voters, and LGU personnel using React.js and Tailwind CSS.
- Integrated frontend systems with blockchain-backed backend services for secure vote verification.

### PROJECTS

#### Smart Helmet System (Capstone Project)

November 2024 – July 2025

- Developed an IoT-based disaster response system for environmental and health monitoring.
- Built a React.js dashboard for smoke, toxic gas, body temperature, and environmental temperature tracking.
- Applied MAD and Z-score anomaly detection for faster rescue decision-making.

### EDUCATION

#### Bachelor of Science in Information Technology

January 2021 - April 2026

University of Mindanao – Tagum

### CERTIFICATIONS

- Hyperledger Fabric 2.x Network Design & Setup | Udemy (Rajeev Sakhuja), 2026.
